The Prescott Fire Department will consider and require the following items:

1. Tents and membrane structures that have an area in excess of 400 square feet are to be manufactured of flame resistant material or to be treated with an approved flame retardant. A tent is closed on more than 25% of all sides. A canopy is open on 75% of all sides.
2. Vendors using heat, spark, or flame producing equipment must keep same equipment well away from combustible materials and have an approved portable fire extinguisher close at hand.
3. Food preparation inside an enclosed self-contained structure, producing grease laden vapors, must be equipped with an approved, type 1, grease extraction hood and an approved automatic fire extinguishing system installed within the hood and associated duct work.
4. The City of Prescott has adopted the 2006 International Fire Code, which does not allow cooking of food within a tent, canopy, or membrane structure.
 - **Section 2404.7** *Open or exposed flame. Open flame or other devices emitting flame, fire or heat or any flammable or combustible liquids, gas, charcoal or other cooking device or any other unapproved device shall not be permitted inside or located within 20 feet of the tent, canopy or membrane structure while open to the public unless approved by the fire code official.*
 - **Exception:** *unless the tent, canopy or membrane structure is certified to be flame resistant and the certification is sewn into the fabric and then shall be approved by the code official.*
7. Extension cords must be of the heavy duty, grounded type (12/3) and listed for exterior use (weatherproof). The ground prong must be intact and must only be plugged into a 3-pronged receptacle.
8. Liquid or gas fueled appliances must be in good repair without fuel leaks or frayed electrical cords. Extra fuel must be kept in containers approved for that use and must not exceed 5 gallons in capacity.
9. When closing streets, twenty (20) foot fire lanes are required. They must be approved and indicated on the site plan and Traffic Control Plan. Additionally, parking on adjacent streets must be monitored to ensure passage is not obstructed and temporary "No Parking" signs must be installed where needed.
10. Upon review of the Special Event Permit Application, the Fire Prevention Inspector may require that an on-site inspection take place. If so, the Applicant/Event Organizer will be notified and will then have five (5) working days prior to the event to schedule an inspection. Make an appointment with a Fire Prevention Inspector by calling (928) 777-1765.
11. Banners, signs, arches, and objects shall not be strung or erected across any portion of the street or fire department access; unless the clearance below any part of the object is 13'6" or higher, and the width is one traffic lane wide. Arches placed in the traffic lane shall have a clearance of at least 13'6" from side to side, and shall not diminish the width of one street lane at the base.

This includes the Court House Square which requires a special event permit through the Yavapai County Developmental Services Office at (928) 771-3216.
4. It is the responsibility of the Event Organizer to ensure that vendors, delivery vehicles, staff, or anyone associated with the implementation of the event does not park in any non-permitted parking spaces.
5. Traffic Control Plan Overview: A Traffic Control Plan is used to indicate vehicle/pedestrian traffic control and detour routes. A Traffic Control Plan must be submitted for the proposed closure of any street, sidewalk, alley, right of way and/or parking lot.

10. All street closures must allow for a twenty (20)-ft fire lane access during the event.
11. The Police Department will determine if the special event and street closure requires uniformed personnel to direct traffic and pedestrians.
